RECEIVED JUN 0 2 2008

In the Claims:

Jun 02 2008 14:18

- 1.(currently amended) A water soluble container containing a concentrate composition comprising:
 - (a) at least one surfactant selected from non-ionic surfactants, anionic surfactants, and mixtures thereof which necessarily comprises either
 - (i) a C₁₀-C₁₄alkyl sulfate surfactant, a C₁₀-C₁₄alkyl ether sulfate surfactant or mixture thereof, further in conjunction with one or more nonionic alkylpolyglycoside surfactants, or
 - (ii) at least one nonionic surfactant based on an ethoxy/propoxy block copolymer, further in conjunction with at least one nonionic surfactant based on an ethoxylated fatty alcohol;
 - (b) at least 70%wt. of at least one organic solvent having a solubility in water of at least 4%wt. which comprises propylene glycol n-butyl ether and propylene glycol methyl ether;
 - (c) optionally, but desirably at least one alkanolamine; and
 - (d) optionally, up to about 10% wt. of one or more conventional additives selected from coloring agents, fragrances and fragrance solubilizers, further surfactants, pH adjusting agents and pH buffers, optical brighteners, opacifying agents, hydrotropes, anti-oxidants, and preservatives; wherein said composition contains in excess of 7.5%wt. water, no more than 12.5%wt. water and,

wherein the water soluble container is adapted to form a hard surface eleaning composition via dissolution of the water soluble container and its contents in a container containing an amount of water.

PARFOMAK

- A water soluble container containing a concentrate 4.(previously presented) composition according to claim 1 wherein the concentrate composition comprises (c) at least one alkanolamine.
- A water soluble container containing a concentrate 5.(previously presented) composition according to claim 1 wherein the concentrate composition exhibits a flash point of at least 105°F.

6.(canceled)

- A water soluble container containing a concentrate 7.(previously presented) composition according to claim 1 wherein the concentrate composition comprises:
 - (b) at least 70%wt. of at least one organic solvent having a solubility in water of at least 4%wt. which comprises propylene glycol n-butyl ether and propylene glycol methyl ether and optionally comprises a C₁-C₆ glycol, or a C₁-C₆ monohydric alcohol.
- A water soluble container containing a concentrate composition according 8.(original) to claim 7 wherein the concentrate composition comprises
 - (b) at least 70%wt. of at least one organic solvent having a solubility in water of at least 4%wt. which comprises propylene glycol n-butyl ether, propylene glycol methyl ether and a C₁-C₆ monohydric alcohol.

9.(canceled)

A water soluble container containing a concentrate 10.(currently amended) composition according to claim 1 elaim 9 wherein the (a) at least one surfactant selected from non-ionic surfactants, anionic surfactants, and mixtures thereof consists essentially of a C10-C14alkyl sulfate surfactant, a C10-C14alkyl ether

sulfate surfactant or mixture thereof, further in conjunction with one or more nonionic alkylpolyglycoside surfactants.

- A water soluble container containing a concentrate 11.(currently amended) composition according to claim 1 wherein the (a) at least one surfactant selected from non-ionic surfactants, anionic surfactants, and mixtures thereof comprises at least one nonionic surfactant based on an ethoxy/propoxy-block copolymer, further in conjunction with at least one nonionic surfactant based on an ethoxylated fatty alcohol, and wherein the concentrate composition further includes as a further surfactant an alkoxylated quaternary ammonium compound.
- A water soluble container containing a concentrate 12.(previously presented) composition according to claim 1 wherein the
 - (a) at least one surfactant selected from non-ionic surfactants, anionic surfactants, and mixtures thereof consists essentially of at least one nonionic surfactant based on an ethoxy/propoxy block copolymer, further in conjunction with at least one nonionic surfactant based on an ethoxylated fatty alcohol,

and wherein the concentrate composition further includes as a further surfactant an alkoxylated quaternary ammonium compound.

- The water soluble container according to claim 1 which 13. (previously presented) comprises a thermoformed or injection molded water soluble polymer.
- 14.(original) The water soluble container according to claim 13 wherein the water soluble polymer is poly(vinyl alcohol).
- A process for treating a surface, particularly a hard surface 15.(previously presented) especially one or more selected from polished metal surfaces, glass and mirrors in need of cleaning, comprising the process steps of:

p.5

PARFOMAK

placing a water soluble container containing a concentrate composition according to claim 1 into a larger quantity of water;

allowing the water soluble container to dissolve in the water to form a cleaning solution;

and applying an effective amount of the solution to the surface in need of treatment.

- A water soluble container containing a concentrate 16.(previously presented) composition according to claim 3 wherein the concentrate composition comprises (c) at least one alkanolamine.
- A water soluble container containing a concentrate 17(previously presented) composition according to claim 3 wherein the concentrate composition exhibits a flash point of at least 105°F.
- A water soluble container containing a concentrate 18.(previously presented) composition according to claim 3 wherein the (b) the at least one organic solvent having a solubility in water of at least 4%wt. is present in an amount of at least 75%wt.
- A water soluble container containing a concentrate 19.(previously presented) composition according to claim 3 wherein
 - the (a) at least one surfactant selected from non-ionic surfactants, anionic surfactants, and mixtures thereof comprises a C₁₀-C₁₄alkyl sulfate surfactant, a C10-C14alkyl ether sulfate surfactant and mixture thereof, further in conjunction with one or more nonionic alkylpolyglycoside surfactants.
- A water soluble container containing a concentrate 20.(previously presented) composition according to claim 19 wherein

US Serial No. 10/525982 Page 6 of 10

the (a) at least one surfactant selected from non-ionic surfactants, anionic surfactants, and mixtures thereof consists essentially of a C₁₀-C₁₄alkyl sulfate surfactant, a C₁₀-C₁₄alkyl ether sulfate surfactant and mixture thereof, further in conjunction with one or more nonionic alkylpolyglycoside surfactants.
